Ecodyne Limited ISO 9001-1994 Certified

Ecodyne Limited was recently presented with their ISO 9001-1994 certificate of registration by QMI. Ecodyne Limited has adopted the quality management system in accordance with the ISO 9001-1994 requirements to realize and maintain our quality business goals. These goals have been integrated into the policies and procedures that form the operating practices of Ecodyne Limited.

Ecodyne Limited Quality Policy and Objectives

Ecodyne Limited is committed to providing product that consistently and fully meets the requirement and expectations of our customer. Our quality objectives include:

- Striving for zero defects throughout all of the procedures involved in providing product to our customers.
- The reduction in the cycle time required to produce our product for our customers.
- The reduction in the costs of our product by improving the efficiency of all processes.

For further information on our quality system, contact Ecodyne Limited toll free 1-888-Ecodyne or e-mail us at paul.holmes@ecodyne.com

Ecodyne Offers After-Hours Emergency Cooling Tower Parts and Service

In the event you require cooling tower parts or service beyond normal business hours, weekends or holidays, you can contact an Ecodyne Cooling Tower Representative by calling 416-814-8294 and a representative will be paged to assist you.

Winter Operation of Your Cooling Tower

Ice build up in and around your cooling tower during extreme weather is controllable. Preparation of your tower prior to winter months and proper operating techniques must be employed to eliminate costly repairs and down time.

To discuss the merits of pre-winter inspection and service, air inlet enclosures or other modifications and operating techniques contact Ecodyne Limited toll free at 1-888-Ecodyne, Ext. 404 or by e-mail at jim.seely@ecodyne.com

Cooling Tower Inspection, Repair and Service

Ecodyne provides complete cooling tower service for a wide range of cooling towers, regardless of who originally supplied it. For prompt service including inspections, structural repairs, mechanical overhaul, fill repairs / replacement or upgrades contact our office to discuss your requirements.

Contact Ecodyne Limited toll free at 1-888-Ecodyne, Ext. 404 or by e-mail at jim.seely@ecodyne.com
