“A” Series Right Angle Gear Drives for Cooling Towers

Direct drop in replacements for Marley® gear drives

Ecodyne Limited provides the “A” Series right angle gear drives for Marley® cooling towers. Manufactured by Amarillo Gear, these units maintain the same critical mounting dimensions as the Marley® M Series making replacement easy and cost effective. Foot patterns, shaft dimensions and keyways are unchanged eliminating the need to replace existing couplings and drive shafts. Reduction ratios are within $\pm 2\%$ of the Marley® reduction ratios. Widely accepted by many users, the “A” series drive offers a cost effective replacement with the lead times and service capabilities the cooling tower market requires.

Design features are in accordance with or exceed the minimum requirements of AGMA and CTI standards.

For a quotation or brochure on the “A” series Right Angle Gear Drives, contact Ecodyne Limited toll free at 1-888-Ecodyne, Ext. 334 or by e-mail at mark.kerr@ecodyne.com
